

HAMILTON CODE SYSTEM II

The Hamilton **Code System II** allows you to sell wash codes at multiple locations via remote Point of Sale units. They are ideal for use in c-stores, gas stations, quick lubes, car dealerships, and more.

FEATURES

Codes can be sold at multiple locations and redeemed at one car wash location.

- Codes can be sold inside a store or at the gas pump
- Cashless, code-only wash entry system
- Fleet account capability
- Auditing capabilities include reports on washes sold, washes redeemed, and total sales
- No limitations on distance and no physical limitations
- Auditing capabilities on the master and remote units (must be pulled from each individual site)
- Optional remote POS units allow you to sell wash codes from 14 different locations with four of those locations featuring pay-at-the-pump
- No phone lines, RF connections, or antennas needed
- Enhanced personalization for individuals & groups: name, address, phone number, and email
- Supports multiple wash packages
- Pump protocol requirements: Ryko Code-a-Wash or Unicam, baud rate 19200 or 9600 required

To ensure proper connection and functionality of the Hamilton Code System II with a site controller for Pay-At-The-Pump, it is critical that you provide the following information when ordering:

- External POS manufacturer (e.g. Gilbarco, Ruby, etc.)
- Gas pump protocol: Unicam or Ryko-Code-A-Wash 3/4
- Site controller baud rate
- Remote satellites being implemented

Please contact a Hamilton sales representative if you require further assistance.

INCLUDES:

- Master POS system with remote capabilities
- Keypad assembly
- POS unit and printer
- Car wash interface
- Hardware and wiring
- Pedestal base
- Uninterrupted power supply (UPS)
- 250ft of communication wire (RS485-1 pair twisted/shielded)
